PROJECT WORKED

Final year project
E-Commerce Application

Designing an E-Commerce web application using **.NET CORE** as a front end and **SQL Server** as a backend for a mini project involves several components including database design, user interface, authentication, and functionality implementation.

This e-commerce application is designed exclusively for the sale of books, catering to administrators and customers, a pivotal platform in the digital landscape. With the administrator's role focused on managing inventory, overseeing transactions, and maintaining the integrity of the platform, the customer-facing side serves as a gateway to a world of literary exploration and convenience.

OTHER INTERESTS

Listening to music, playing cricket, Badminton, kabaddi.
